

Personal Statement

The proverb “To study with an aim of seeking knowledge and skills that will enable me to live a meaningful life that is beneficial to the society and individual” has always been an inspiring factor in my academic voyage. Medicine and its practical application has always been a major interest in my life. I long to cure, treat, and hoard the lives of children, elders and women without fretting about my knowledge precincts. I have gained abundant experience till date which set my concerns and priorities on trail and bestow me with tools for becoming a keen doctor. My utmost confidence of succeeding in the medical stream breeds with no hesitation as I endeavor and breathe for knowledge.

For a number of times, I have observed the frailty of the otherwise vigorous existence of patients owing to their physiological setting. The dreadfulness of seeing the ongoing decline of a resolute life is purely beyond narration. However, I have chiefly mutated this terror into a drive behind all my scholastic accomplishments and proficient practices. For me, triumph has simply one connotation, that is, to disentangle the obscurities of the ailments persecuting human beings and to contribute to my patients’ welfare.

I have worked for University Center for Cancer Research and have gained much insight about the multitasking skills along with experiencing to work under anxiety and stress. I have also experimented on diverse nanotechnologies to enumerate and analyze the protein aggregation in living cells. Subsequent to being awarded as a National Merit Semi-Finalist, I become all the more determined to pursue my dream of entering the medical field and excelling in the same. To struggle to be amid the pinnacle of top hundred in my stream has often been my ambition. Over the past few years, I have devoted all my gusto and power to my scholarly accomplishments, i.e., to my research and studies equally, for the manifestation of this objective.

In the course of my academic endeavors, I have not just set a stiff yet all-inclusive foundation in medical surmise but have also urbanized a sound knack in meticulous yet bendable logical judgment and methodical commitment. All through the classroom ponderings and discussions, I could always sway my colleagues with my persuasive staging, precise and reasonable analysis

and thorough experimental figures. Besides that, I have also received universal recognition from the professors and trainers who educated me.

With mounting age, I am now frequently assailed with the question of how I wish to recommence the rest of my life. To numerous, this may seem intimidating, but since the time I understood that there always will be a widespread need for assistance, my brain has been made up. Whenever a teacher, analyst or any other figure whisk out this question, I respond back with the only answer of becoming a doctor in the near future. I have spun my high school life around this goal, since it is an ambition worth being put on a podium. Fledgling moment to now, I have inundated my calendar with Pre-AP and AP lessons to create an extensive and firm knowledge of an assortment of subjects.

I have cherished a long and profound desire for an opportunity to read in your respected university. An opportunity to study in your revered institution will ensure that the qualities I have will not only be fundamental for my career encroachment but will also be valuable to the larger society sphere. I am constructing this application fully competent of meeting your demanding academic standards out of my longing and drive to succeed in the future. Having understood my passion and concern to join your medical school and my desire to excel in the respective field, I hope you will acknowledge my application.
